## ***President Message***

Product shipping occupies an important corner of today's abundant distribution and information society. In this age of rapidly diversifying needs and ever-increasing speed, a precious aspect that we must not forget is making our customers happy by conducting transportation activities with sincerity. Since its establishment in 2007, EWLS has striven to offer shipping solutions that meet our customers' needs, and to continue enhancing and developing these solutions as a company providing integrated special transportation and installation services for heavy high-precision equipment. Thanks to all those who have supported us, we have continued to grow as Afghanistan's economy develops. We will continue working tirelessly under the motto of "Solution for all your Transportation & Logistics," which is our responsibility as a special transportation provider. It is Afghan tradition to wrap important packages in cloth and hold them close to one's chest as one delivers them. We endeavour to be that wrapping cloth for our customers. We will transport products to their destinations and present them to their recipients with sincerity as we continue to deliver reliability in a swift and secure manner, with the integrity our customers have come to depend on. We look forward to seeing their gleaming smiles as they receive the package as if they were untying the knot of the traditional wrapping cloth. Based on the mission and responsibilities incumbent upon us, and our track record and reliability, we accommodate the needs of the daily-changing market with humility. We will consider matters from the customer's perspective, further maintain and improve our management base, and continue to advance our sophisticated technologies. I cordially request your continued support in these endeavours.

Sincerely

Mohammad Ismael Noor zai
